

24 November 2021

Dear HIGH END exhibitor,

Our expectations are high as we look forward to the HIGH END 2022 and the IPS – International Parts + Supply trade shows, which will finally take place again at the MOC Event Centre in Munich next May after having to pause for two years.

To ensure that we can hold both events safely, we are continuously adapting our hygiene and safety concept in accordance with the current situation.

All of the measures taken will be based on the version of the Bavarian state ordinance on tackling the Covid-19 pandemic (*Infektionsschutzmaßnahmenverordnung*) that is valid at the time of the event. The current concepts are permitted for trade shows and exhibitions held in Bavaria:

- **3G rule: Anyone who is not fully vaccinated or has not recovered from a recent Covid-19 infection must present a negative test result from either a rapid antigen test (max. 24 hours old) or a PCR test (max. 48 hours old).**
- **3G+ rule: The same as the 3G rule, but rapid antigen tests are not permitted.**
- **2G rule: You must be fully vaccinated or have recovered from a recent Covid-19 infection to attend.**
- **2G plus rule: Only those who have been fully vaccinated or recovered from Corona are entitled to access. In addition, a negative Coronatest result must be presented (rapid antigen test under supervision, valid for 24 h).**

As the event organiser, we are additionally permitted to stipulate the access authorisation concept for **exhibitors and visitors** ourselves. We promise you that we will take the best possible precautions to protect the health of all parties involved in our trade shows. Depending on the pandemic situation, we therefore reserve the right to take the most effective measures possible in order to guarantee the safe running of the events.

Please also note that, in accordance with the current regulations, only persons who have been vaccinated with vaccines approved in the EU or equivalent vaccines in third countries are permitted to enter Germany.
