

FLUANCE

Fluance is a Canadian-based High Fidelity Turntable brand which was established in 1999. We are currently seeking an experienced audio technician/engineer consultant to validate our turntables by running prototypes and production models through a test plan with the purpose of validating our designs and specifications. An attractive candidate would have a passion for audio electronics with a proven track record of delivering new audio products into the market. This is an opportunity for an enthusiastic and knowledgeable audio consultant to play a key role in the future of a successful and well-respected audio brand. Our success is measured in our customer satisfaction ratings and dedicated following.

Contract Details:

- Job Type: Contract; product by product as needed.
- Salary: Contract position billed hourly or per test plan/project.
- Experience level: 2-5 years
- Schedule: Once the test plan is confirmed, a 2-4 week turnaround would be expected for you to deliver us with the results.
- Work Location: Same as test equipment location. We ship the product to you.

Key Responsibilities:

- Identify potential product risks or issues with specifications or features and propose solutions using the appropriate technologies to ensure that products are successful in the marketplace.
- Run experiments and use analytics to measure the product's performance and identify opportunities for improvement.

Qualifications:

- Post secondary education, Electronic or Mechanical Engineering, or a related field.
- Experience with the mechanics of turntables and their specific testing requirements.
- Has access to the necessary equipment to perform this testing. Tests include but not limited to, Wow/Flutter, THD, SNR, Speed consistency, Platter wobble, Effective Tonearm Mass, etc. A full list can be provided to candidates who apply. A list of your test equipment will need to be provided to us.
- A resume showing experience in audio, specifically turntables, listing real world examples.
- Electro-mechanical engineering competency within the Acoustic field of study
- Strong passion for delivering high performance products that meet design and business goals providing a high-quality user experience.

You Will Stand Out If:

- You have experience working with and successfully launching consumer electronics into the market.
- You are an audiophile with a history of loving music and getting the best sound out of a audio system.
- You understand the importance of maintaining a high review rating and what it takes to develop and design products that continue to support that in a long-term vision.
- You understand and know how to look up and test to standards. E.g. NAB, CCIR, DIN, JIS, ANSI, RIAA, IEC, etc.
